Community Health Needs Assessment

2016
Our Mission:
To improve the health and well-being of society, particularly the citizens of Alabama, by providing innovative health services of exceptional value that are patient- and family-centered, a superior environment for the education of health professionals, and support for research that advances medical science.

Our Vision:
UAB Medicine will enhance its role as a preeminent and fully-integrated clinical enterprise, recognized as a leader in the advancement of medical science and the delivery of health-related services that are patient- and family-centered. With the UAB School of Medicine, the UAB Health System will create highly innovative, well-coordinated interdisciplinary services and partnering relationships that serve as a model for health education and service delivery.

Our Values:
- **Always care** - Listen with empathy, be compassionate, and support those in need.
- **Own it** - Be accountable, take action and make it happen.
- **Work together** - Think win-win, build consensus and play your role on the team.
- **Do right** - Follow through, work with principles and do no harm.

Our Culture:
Our employees embrace these values and together they represent the goal of providing excellence in all we do.

Executive Summary

On March 23, 2010, the Patient Protection and Affordable Care Act (ACA) was signed into law and created new requirements for not-for-profit hospitals including a requirement for a Community Health Needs Assessment (CHNA) to be completed every three years. This report was prepared by Alabama Quality Assurance Foundation (AQAF) in conjunction with The University of Alabama at Birmingham Health System to meet the CHNA requirement for UAB Hospital for fiscal year 2015-2016. AQAF is the Quality Improvement Organization (QIO) for the state of Alabama and has more than three decades of experience in identifying and addressing community health needs.

To prepare this CHNA report, data were gathered from a variety of sources in an effort to construct a comprehensive, current and accurate snapshot of the health issues in Jefferson County, Alabama. Data were obtained from multiple public data bases and opinions were solicited from public health experts and community leaders within the community served by UAB Hospital. This information was summarized for final consideration by a CHNA team consisting of hospital and system personnel, as well as community members. This team prioritized the community health needs as follows:

1. Access
2. Diabetes Education
3. Hypertension / Stroke Prevention and Education

An implementation strategy that will address each of these issues is currently in development. The strategy will seek to leverage valuable partnerships that currently exist, identify novel opportunities for synergy, and maximize legacy programs while deploying specific interventions within the community. The outcomes and results of these interventions will be followed and reexamined in preparation for the next CHNA scheduled for completion no later than Summer 2019.
Methodology

The needs assessment process was initiated by assembling an internal team responsible for shepherding the entire project. The internal team was comprised of representatives from hospital management, strategic planning, and AQAF. This team met initially to review the requirements of the CHNA as established by the ACA and further defined by IRS Notice 2011-52, and to establish the roles and responsibilities for the team members. These decisions were memorialized in a project plan and incorporated into a project dashboard. A secure, web-based portal was established to provide reliable communication among the team members and ready access to the project plan and dashboard. With the infrastructure created and the purpose and scope of the project identified, the team set about its primary task of gathering data.

The first step in the data gathering process was to obtain several de-identified data sets from the hospital. The initial task was to obtain zip codes derived from the hospital’s inpatient discharges. These data sets were then analyzed to compile zip code maps defining the hospital’s service area. Additional data sets were requested from the hospital including admission data stratified by age, race, ethnicity, payer mix, and discharge diagnoses. With the service area of the hospital determined, a best fit county was selected for data collection from secondary (public) sources and for the purposes of comparison. Secondary sources utilized for this report include:

- Behavioral Risk Factor Surveillance Survey
- Youth Risk Factor Behavior Surveillance Survey
- Alabama Department of Public Health, Center for Health Statistics
- Alabama Department of Public Health, Cancer Registry
- Georgia Department of Public Health
- U.S. Census Bureau
- U.S. Bureau of Labor Statistics
- County Health Rankings and Roadmaps
- Community Health Status Indicators

The second step was to gather information from various representatives of the community. The CHNA team met to establish a list of key informants that included individuals with public health expertise, state and local officials, and community leaders. Topic areas and interview questions from the previous CHNA were reviewed to determine the appropriateness of utilizing for this CHNA. The topic areas were then used to develop survey and interview tools that were utilized in discussions and interviews with their identified key informants. The results of these surveys and interviews were then compiled.

Distillation of these data into a prioritized list was the final step of the Community Health Needs
Assessment. The CHNA Oversight Committee met to complete this final task. AQAF staff presented the data collected. The Oversight Committee members then established the agreed upon top 3 health care priorities for their community. The information presented to the CHNA Oversight Committee and the final prioritized list of health care needs are summarized in this report and will also be displayed on UAB's website.
Community Description

Geographic Area Defined

UAB Hospital’s Community is defined using the 119 zip codes derived from 75% of UAB’s inpatient discharges from fiscal year 2015. The zip codes encompass 29 counties, all in the state of Alabama. Fifty percent of these zip codes are concentrated in four counties: Jefferson (36.13%), Shelby (6.72%), St. Clair (5.88%), and Talladega (5.04%). For the purpose of this study, The University of Alabama Hospital community is defined as Jefferson County, Alabama. The zip codes are listed in descending order from high concentration of discharges to lower concentration of discharges. The zip codes are as follows:

35215  35064  35040  36330  36272
35211  35218  36117  35057  35151
35020  35210  35055  36301  36360
35205  35071  35079  36703  35096
35206  35180  35115  35179  36801
35214  35243  35504  35501  35404
35242  35224  36203  35117  35184
35208  35221  35077  35954  35953
35204  35160  36201  36109  35046
35216  35124  36116  35116  36574
35212  35094  35045  35128  36066
35209  35121  35146  35906  36853
35207  35007  35503  36108  36303
35217  35111  35903  35910  35550
35226  35010  36207  35594  35058
35023  35150  35401  36206  35085
35234  35068  35062  35031  35172
35244  35901  35080  36830  35950
35228  35213  35004  35967  36804
35222  35005  35125  35051
35126  36701  36265  36092
35022  35127  35565  35630
35173  35405  36067  35957
35235  35120  35043  35555
35203  35223  35904  35475

Jefferson County Alabama has a total area of 1,122.3 square miles of which 1,111 square miles are land and 11.2 square miles are water (Graph 16). Jefferson is the most populous county in the state. Birmingham is the county seat and also the state’s largest city. There are 34 municipalities located within the county. The county is governed by five commissioners elected from specific county districts. The county is 89% urban, and 11% rural areas. The neighboring counties are Bibb, Blount, St. Clair, Shelby, Tuscaloosa, and Walker. Due to its location in the north central part of the state and the foothills of the Appalachian
Mountain, the county is characterized by rolling hills and valleys.
Demographics

Population

Located in central Alabama, Jefferson County is a mix of urban, suburban, and rural environments. It is the largest county in the state in both land mass and population. There are 67 communities within the county, 34 of which are incorporated municipalities. According to the U. S. Census Bureau, the most recent population estimate for Jefferson County is 660,793 (Table 1). The dominant language is English, with 5.9% speaking another language in the home.

Race/Ethnicity

The population of Jefferson County is 54.0% white, 42.9% black, and 3.1% other (Graph 20). The U.S. Census Bureau considers Hispanic/Latino heritage as an ethnicity and not a race. Of Jefferson County residents responding to the most recent census, 3.8% consider themselves to be of Hispanic/Latino origin. Persons of Hispanics/Latino origin may be of any race and are included in the applicable race categories above. The Hispanic/Latino population of Jefferson County is equal to the state average of 4.1%.
Education

Of Jefferson County’s 660,793 residents, 23.1% (152,643) are under 18 years old (Graph 18) and are served by 12 school systems. There are 11 city systems and one run by the Jefferson County Board of Education. This county system is Alabama’s second largest school district with 56 schools, 2,500 teachers, and 36,000 students. The system offers a multitude of academic, career technical, and extracurricular opportunities for students. The Birmingham City School System serves students in the City of Birmingham with 43 schools, 18 elementary schools, eight middle schools, 10 K-8 schools, and seven high schools. There are 115 private schools offering Pre-K-8 and 39 schools offering grades 9-12. Of the county’s residents, 87.7% graduated from High School (Graph 22).

Jefferson County offers many post-secondary education opportunities. The University of Alabama at Birmingham, Birmingham Southern College, and Samford University provide the area with major colleges of medicine, dentistry, optometry, pharmacy, law, engineering, and nursing. Of the county’s residents, 30.3% hold a Bachelor’s degree or higher (Graph 23). Birmingham has been the home of the University of Alabama School of Medicine since 1947. Birmingham is also home to three of the state’s five law schools.

Employment

Jefferson County is an economic catalyst for the state. Not only does it have many companies and organizations with a large employment base, but it is a hub for medical care. UAB has an extensive healthcare complex and is the second largest employer in the state. The Per Capita Income of a Jefferson County resident is $26,896 and median family income of $45,239 (Graph 24). The percentage of residents living below the poverty level is 19.5% (Graph 25). The unemployment rate for Jefferson County is 6.2% which is the same as the state of Alabama.
UAB is the largest healthcare provider in the state, while Blue Cross Blue Shield of Alabama is the major health insurance carrier in the state with corporate headquarters in Birmingham. Major financial institutions include Regions, BBVA/Compass, and Wells Fargo. Honda Manufacturing and Mercedes-Benz, each with 4,000 employees, are located in adjacent counties within driving distance of Birmingham. U.S. Steel and American Cast Iron and Pipe are the major manufacturing employers.

In April 2014, the Birmingham Business Alliance lists the largest employers in Jefferson County as follows:

**TOP TEN EMPLOYERS**
1. University of Alabama at Birmingham (23,000)
2. Regions Financial Cooperation (7,668)
3. AT&T (5,750)
4. St. Vincent’s Health System (4,644)
5. Children’s Health System (4,497)
6. Blue Cross Blue Shield of Alabama (4,000)
7. Alabama Power Company (3,982)
8. Baptist Health System (3,200)
9. BBVA Compass (2,606)
10. American Cast Iron Pipe Company (2,400)

U.S. Bureau of Labor Statistics reported that employment increased in all of Alabama’s six largest counties from June 2014 – June 2015. Jefferson County had a 0.4% increase in employment during that time period.
Roads and Transportation

The roadway system in Jefferson County provides residents and companies transportation access to all major cities in the Southeast and throughout the United States. The 5 major interstates located throughout the county are I-20, I-22, I-59, I-65, and I-459. U.S. Highways 31 and 280 carry travelers through downtown Birmingham and over Red Mountain into surrounding communities.

Public Transportation is limited in Jefferson County. The Birmingham-Jefferson County Transit Authority (BJCTA) operates public transportation for the county. Bus service runs regularly, along fixed routes, from the transportation center to multiple points in Birmingham, Bessemer, Center Point, Fairfield, Homewood, Midfield, Mountain Brook, Hoover, Tarrant, and Vestavia Hills. The downtown natural gas trolley service is available for three routes through the City Center. Greyhound provides intercity bus transportation to cities across the United States. Current service area is 200 square miles with a demand population of 400,000.

The Birmingham Shuttlesworth International Airport is home to four major airlines and offers 100 daily flights to 23 cities throughout the US. In 2014, a $201 million terminal upgrade was completed, replacing the 40 year old terminal and its concourses.

The Birmingham region has rail transportation for both passenger and freight. There are daily Amtrak stops connecting to most major cities in the U.S. Metropolitan Birmingham has three rail hubs: Norfolk Southern, CSX, and BSNF.
The State of Alabama contains an extensive waterway system. Port Birmingham is located in the western part of Jefferson County on the Warrior River. River service connects to the deep water Port of Mobile. It offers fleeting and shifting services and can store up to 40 barges. It also offers access to inland as well as international ports.

Weather/Air Quality

Jefferson County has a humid subtropical climate, characterized by hot summers, mild winters, and abundant rainfall. The spring and fall months are pleasant but variable as cold fronts frequently bring strong to severe thunderstorms and occasional tornadoes to the region. The fall season features less rainfall and fewer storms, as well as lower humidity than the spring, but it is also a secondary severe weather season. Birmingham is located in the heart of a Tornado Alley due to the frequency of tornadoes in Central Alabama. The state was hit by an EF4 tornado in 2011. In Jefferson County alone, 4,800 homes were significantly damaged or destroyed and 20 people were killed. The neighboring County of Tuscaloosa’s death toll was 44. More recently, a tornado rated an EF2 touched down in Jefferson County on March 1, 2016, primarily damaging the Bessemer area. Thirty homes were damaged and four people were injured. In the late summer and fall months, the area experiences the results of occasional tropical storms and hurricanes due to its proximity to the Central Gulf Coast.

From the 1970s to the early 2000s, Jefferson County was classified at times as a nonattainment area for ground-level ozone and particle pollution by the Environmental Protection Agency (EPA). This occurs when pollution levels exceed federal limits. Through the cooperation of the community and other entities, Jefferson County has been designated as attainment area for the eight-hour ozone standard since 2012.
Jefferson County residents are well served by an abundance of inpatient hospitals in the area.

  - Medical West (Affiliate)
  - Spain Rehabilitation Center
  - UAB Hospital - Highlands
  - Women & Infants Center
- Veterans Affairs Medical Center

A small area of West Central Jefferson County is currently designated as a Medically Underserved Area Population (MUAP) according to criteria developed by the Department of Health and Human Services (see Illustration 2 below). This designation is based on an index of four variables; the ratio of primary care physicians per 1,000 populations, the infant mortality rate, population living below the poverty line, and population over the age of 65. Jefferson County is considered a Health Professional Shortage Area (HRSA) for low-income residents in areas of primary care, dental care, and mental health care. Low income residents of Jefferson County are able to utilize the county’s charity healthcare system, Cooper Green Mercy Hospital. Due to financial concerns, the inpatient services were discontinued in late 2012, but the facility continues to provide chronic and urgent care to those in need of free or subsidized healthcare. Although many in the community have the needed healthcare services, The University of Alabama Hospital’s faculty and staff are committed to providing world-class care for persons throughout Jefferson County, Alabama, and the World.
The University of Alabama at Birmingham (UAB) Health System is an academic medical center located in Birmingham, Alabama. It is one of the top five largest academic medical centers in the country with over 11,000 employees and 900 physicians. The health system is comprised of UAB Hospital, The Kirklin Clinic of UAB Hospital, The Kirklin Clinic at Acton Road, UAB Callahan Eye Hospital, UAB Hospital - Highlands, Medical West (affiliate), Baptist Health Montgomery (affiliate), Spain Rehabilitation Center, Hazelrig-Salter Radiation Center, and UAB Women’s & Infants Center. UAB encompasses more than 90 city blocks.

UAB Hospital is the centerpiece of the UAB Health System. It is located in the medical district of the city on The University of Alabama at Birmingham campus at 1802 6th Avenue South Birmingham, Alabama 35233. It is a Level 1 Trauma Center. As one of U.S. News & World Reports best hospitals, UAB is a national leader in patient care, research, and training, providing the most up-to-date treatments and innovations in health care. The hospital is recognized as a Center for Nursing Excellence and is the only adult-care hospital in the state of Alabama that has earned Magnet status, a designation awarded by the American Nurses Association. UAB Hospital is a major center for clinical research and the home of some of the top medical programs in America. The hospital’s faculty and staff are committed to providing world-class care for patients throughout Alabama and the World. UAB has partnered with its community and state, spurring phenomenal progress over a half century. Its growth as a world renowned research university and medical center has driven the social, cultural, and economics of Birmingham. UAB Hospital is committed to providing a continuum of health services of the highest quality. The resources of the hospital and expertise of the staff set a national standard for health care delivery. A vision for a healthier and more prosperous city, county, and state remain foremost for UAB.
As the centerpiece of the UAB Health Systems, UAB hospital provides a complete range of primary and specialty services, as well as the most up to date treatments and innovations in health care.

### UAB INPATIENT SERVICES

1,157 in-patient beds (UAB and UAB Hospital - Highlands)

49,358 discharges yearly

Intensive Care Units (ICU)
- Bone Marrow Transplant (BMT) 17 beds
- Cardiac (CCU) 21 beds
- Cardiovascular(CICU) 20 beds
- Heart Transplant (HTICU) 20 beds
- Medical (MICU) 25 beds
- Neurological (NICU) 36 beds
- Trauma Burn (TBICU) 28 beds
- Surgical (SICU) 20 beds

Surgery
- 17,701 inpatient surgeries/year
- 14,825 outpatient surgeries/year

Comprehensive Transplant Institute
- 400+ Transplants Yearly
  - Heart
  - Liver
  - Lung
  - Kidney
  - Pancreas

Center for Psychiatric Medicine

Chaplaincy/Pastoral Care Services

Clinical Lab and Pathology

Emergency Room
- 98,962 visits/year
- 38,000 Square Feet/ 45 Individual Patient Rooms
- Critical Care Transport (Worldwide)
- Level 1 Trauma Center
- Two 40 slice CT Scanners

### Health Facility Transportation

  - Neurology Pain Clinic
  - Infectious Disease
  - Rheumatology Clinic
  - The Travelers’ Health Clinic - Suite 502
Spain Rehabilitation Center is one of the Southeast’s foremost providers of comprehensive rehabilitation care located at 1717 Sixth Avenue South Birmingham, Alabama 35233. Immediate access is provided via a crosswalk to UAB Hospital.

**INPATIENT SERVICES**
- 47 Private Inpatient Rooms
- Aquatic Therapy Pool
- Therapy Gyms
  - 2 fully-equipped
  - 1 specialized brain injury
- Crosswalk Access to UAB Hospital

**OUTPATIENT THERAPY**
- Audiology
- Balance and Vestibular Training
- Cardiac Rehabilitation Program
- Constraint Induced Aphasia Therapy
- Driver Rehabilitation Services
- Electromyography Clinic
- Locomotor Training
- Neuropsychology/Clinical Psychology
- Occupational Therapy
- Orthotics and Prosthetics
- Physical Therapy
- Physician Clinic Outpatient
  - Amputee Clinic
  - Brain Injury Clinic
  - Orthopedic Clinic
  - Women with Disabilities Clinic
  - Wound Care Clinic
- Speech Therapy
- Spinal Cord Clinic
- Taub Therapy
  - Stroke
  - Traumatic Brain Injury
- Wheelchair Seating and Positioning Clinic
UAB WOMEN & INFANTS CENTER

State of the art facility dedicated to caring for healthy and high-risk pregnant women, healthy and high-risk newborns and a variety of gynecological problems, including gynecological cancers.

INPATIENT FACILITIES
- 4,135 deliveries/ year
- Maternal Fetal physician on-call 24 hrs/day
- Private rooms including:
  - Labor, ante partum, postpartum, and gynecology
- Breast Feeding Lactation Support
- Single room neonatal ICU care
  - 55 bassinettes Regional Neonatal ICU (RNICU)
  - 52 bassinets Continuing Care Nursery (CCN)

OUTPATIENT CLINIC FACILITIES
- Maternal Fetal Medicine Clinic (High Risk OB)
  - Prenatal Genetics Clinic
  - Fetal Diagnosis and Care
  - First Trimester Screening
  - Multiples Clinic
- Gynecologic Oncology
- Obstetrics and Gynecology
  - Urogynecology and Pelvic Reconstruction Surgery
  - Reproductive Endocrinology and Infertility
- Tot-shots
Patient data includes nine months of FY 2015 for UAB Hospital and is detailed below and includes primary/admitting diagnosis, payor source, inpatient demographics, and discharge disposition.

In an effort to measure how UAB Hospital’s community of Jefferson County compared to a peer county, the U.S. Department of Health & Human Services 2015 Community Health Status Indicators (CHSI) report was utilized. CHSI uses population size, poverty level, age distribution, population density, and other demographic data to establish comparison communities across the United States. Of the 43 counties considered to be peer counties to Jefferson County, Fulton County, Georgia was selected for this CHNA based on its’ similar location in the southeastern section of the United States.

DATA AGGREGATION

Data from primary and secondary sources were analyzed. Secondary source data were aggregated at the smallest unit available - the county. Secondary data reports and other resources were carefully reviewed for this CHNA in order to provide points of comparison for the information and opinions gathered through the primary information collection process. Information from primary sources was obtained via electronic surveys, face-to-face surveys, and phone and in-person interviews.

Behavioral Risk Factors

The Behavioral Risk Factor Surveillance System (BRFSS) is the world’s largest, on-going telephone health survey system, tracking health conditions and risk behaviors in the United States yearly since 1984. Currently, data are collected monthly in all 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and Guam. It is a state-based system of health surveys that collects information on health risk behaviors, preventive health practices, and health care access primarily related to chronic disease and injury. For many states, the BRFSS is the only available source of timely, accurate data on health-related behaviors.

County Health Rankings

Secondary data available on Jefferson County and all counties in the nation are available at www.countyhealthranking.org. This annually updated site establishes a benchmark using Health Outcomes and Health Factors. The County Health Rankings are a key component of the Mobilizing Action Toward Community Health (MATCH) project. MATCH is the collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. The rankings identify the multiple health factors that determine a county’s health status. Each county receives a summary rank for its health outcomes and health factors - the four different types of health factors include: health behaviors, clinical care, social and economic factors, and the physical environment.

- Alzheimer's disease deaths
- Chronic kidney disease deaths
- Motor Vehicle Injuries

Data range from 0.00 to 250.00.
Surveys/Interviews

In order to formulate a comprehensive list of the greatest health needs within the UAB Hospital Birmingham community, survey and interview questions were developed and subsequently conducted with a target audience. Using the guidance provided in IRS Notice 2011-52 on Community Health Needs Assessments for tax-exempt hospitals, the CHNA team identified key informants. The list of key informants included health experts at the state and community levels and local civic leaders. These key informants were queried using a variety of techniques including electronic survey, and telephone and in-person interviews. Below is a list of the survey questions and the weighted responses:

**Which are Most Pressing Health Concerns in Your Community? (Interviews/Survey)**
- Access
- Affordable healthcare
- Obesity/Nutrition
- Diabetes

**Which are the Problems/Concerns in Your Community? (Survey)**
- Lack of exercise
- Access to healthcare
- Obesity
- Increasing elderly population
- Poor diet
- Economy

**Most Pressing Problems & Concerns In Your Community (Survey)**
- Obesity/nutrition and weight status
- Diabetes
- Access
- Cancer
- Tobacco use
- Social determinants

**Most Common Cause of Death in Your Community? (Survey)**
- Heart disease & stroke
- Cancer
- Obesity
- Mental health

**Main Reason People Don’t Seek Healthcare in Your Community? (Interviews/Survey)**
- Cost
- Transportation
- Timeliness of appointments/scheduling barriers
- Healthcare literacy
- Access
- Not enough providers

**What is the Hospital’s Role in Addressing Needs? (Interviews/Survey)**
- More primary care clinics
- Prevention education
- More community involvement
- Quality and affordable healthcare
- Offer services timely and appropriately
- Follow-up on discharge plan from the hospital
RESULTS

Summary of Findings

The CHNA Coalition Committee, consisting of representatives from hospital senior management and multiple community leaders, completed a private ballot to determine the top five issues of the community. The ballot prompted each committee member to rank order a list of community concerns. The results demonstrated the committee members’ healthcare priorities, as well as the voting frequency of each item on the ballot. A Borda-type methodology was used to tabulate the results. The top three issues considered to be of greatest need in the community are as follows:

1. Access
2. Diabetes Education
3. Hypertension / Stroke Prevention and Education

Identifying the needs of the community provides UAB Hospital the opportunity and the knowledge to better align existing programs and to design future efforts to best meet the needs of their community. UAB Hospital is part of a health system committed to providing a continuum of health services of the highest quality.
