The UAB Comprehensive Cancer Center is one of only 45 cancer centers in the United States and the only one in Alabama and the Deep South designated as “comprehensive” by the National Cancer Institute.

Research at the CCC has pioneered advances in chemotherapy, surgery, radiotherapy, immunotherapy, and nutrition.

More than 350 cancer physicians and researchers conducting 180 clinical trials for cancer alone.

More than $92 million in direct funding to CCC members for cancer research.

Dedicated Phase 1 clinical trials program offers patients the chance to receive experimental treatments long before they are widely available.

Provides ongoing care for more than 20,000 patients, with over 5,000 new cancer cases evaluated annually.

Employs the largest group of cancer specialists in Alabama, focusing on specific cancer types across 12 clinical areas.
