

## UAB Medicine Mobile App

UAB Medicine has created a mobile app to give you access to your UAB patient portal account and other UAB Medicine information and services.

You can download and install the free app from the Apple App Store or the Google Play Store

Apple Store

Google Play Store

When you open the app you will see this home screen with links to your UAB Patient Portal account and other information and services, including:

- UAB Provider Directory
- UAB eMedicine – for online treatment of 20 common medical conditions
- A searchable directory of current clinical trials
- Information to help you plan your visit to a UAB facility

After tapping the Patient Portal button, you will see this screen, where you can enter the email address (or username) and password you use to access your *My UAB Medicine* patient portal account.

Once you have logged on to the patient portal you can:

- view your lab and radiology results
- review summaries from your UAB visits
- request prescription refills
- access the latest health information from Medline
- send a message to your UAB provider
