

MULTIDISCIPLINARY ENDOCRINE TUMOR CLINIC

In 2019, UAB Medicine launched the Multidisciplinary Endocrine Tumor Clinic, which is staffed by a team of UAB experts in endocrinology and endocrine surgery. We offer comprehensive, streamlined care for patients with endocrine tumors, such as thyroid cancer, hyperparathyroidism, multiple endocrine neoplasias (MENs), and functional adrenal tumors.

Patients benefit from seeing a team of specialists in a convenient, single initial clinic consultation, which is easier for patients and speeds up the treatment process. Patients may not visit with each specialist on the team, but all of the specialists are involved in reviewing cases and recommending a treatment plan that is well-coordinated and tailored to each individual patient.

IS THE MULTIDISCIPLINARY ENDOCRINE TUMOR CLINIC RIGHT FOR YOU?

Patients diagnosed with an endocrine tumor that may be suited for surgical treatment must be referred by their current physician. After referral, patients will be scheduled for a consultation, without requiring the patient to agree to surgical treatment before the referral.

Common diagnoses among clinic patients include:

- Thyroid cancer (all types)
- Hyperparathyroidism and parathyroid cancer
- Multiple endocrine neoplasias (MEN1, MEN2a, MEN2b, FMTC)
- Pancreatic and other neuroendocrine tumors
- Adrenal tumors (hyperaldosteronism, pheochromocytomas, adrenal)
- Cushing's disease (for tumors larger than 3.5 cm)

NEXT STEPS

If you and your physician believe the Multidisciplinary Endocrine Tumor Clinic is right for you, referring providers may call 205-934-1211 and speak with Vernessa Williams to begin the process.

The UAB Multidisciplinary Endocrine Tumor Clinic is located in the Surgery Clinic on the 3rd floor of The Kirklin Clinic of UAB Hospital, at 2000 6th Avenue South, Birmingham, AL 35294.
