UAB PCD and Bronchiectasis Clinic

UAB Medicine’s Division of Pulmonary, Allergy and Critical Care Medicine is pleased to announce the new UAB PCD (Primary Ciliary Dyskinesia) and Bronchiectasis Clinic. Led by George M. Solomon, M.D., the clinic treats patients with the compassionate, personalized care they deserve. Our expert multidisciplinary team includes pulmonologists, nurse practitioners, registered nurses, respiratory therapists, exercise therapists and other medical professionals, all highly skilled at treating bronchiectasis.

The UAB PCD and Bronchiectasis Clinic provides diagnosis, treatment and follow-up for:
- Adult bronchiectasis
- Primary Ciliary Dyskinesia (PCD)
- Other causes of chronic pulmonary infections

We offer a variety of services, including:
- Access to the latest medications and clinical trials
- Respiratory therapies to improve breathing ability
- Exercises to decrease respiratory symptoms and improve muscle strength and endurance
- Stress management, relaxation exercises and emotional support
- Nutritional counseling
- Patient and family education and counseling
- Specialized referral testing for diagnosis

The UAB PCD and Bronchiectasis Clinic is located on the fourth floor of The Kirklin Clinic of UAB Hospital at 2000 6th Avenue South, Birmingham, AL 35233

For physician-to-physician consultations, or to refer your patient, please call UAB MIST at 1.800.UAB.MIST (1.800.822.6478)
