UAB Medicine is pleased to announce the new UAB Comprehensive Ovarian Cancer Program. Our mission is to improve the lives of women at risk for, or affected by ovarian cancer. This is a navigator-driven, patient-centric program that is the first of its kind in the Southeast and centralizes important ancillary aspects of ovarian cancer care for patients and their families, including genetic counseling, supportive care and nutritional counseling. Patients receive their treatment within the UAB Women & Infants Center, a beautiful state-of-the-art clinical, chemoinfusion and inpatient facility designed and dedicated specifically for women’s health. We have dedicated a team of highly trained physician providers, advanced practice clinicians, nurses and support staff to focus on care - one patient at a time. At UAB, we understand the urgency that comes with a potential gynecologic cancer diagnosis and want to be your first thought for your patient’s care. We are committed to evaluating your patients, within one business day, when necessary.

UAB Comprehensive Ovarian Cancer Program will provide:
- Nurse navigators
- Pre-vivorship Program
- Nutritional therapy
- Spiritual support
- Fertility preservation
- Naturopathic medicine services: herbal and botanical preparations, dietary supplements, physical therapy, exercise therapy, hydrotherapy, cryotherapy, life counseling regarding exercise, improved sleep and stress reduction, acupuncture and chiropractic care
- Oncology rehabilitation: physical therapy, lymphedema, neuropathy, occupational therapy and home health evaluation
- Mind/body medicinal treatment: pet therapy, musical therapy, counseling services to the individual, couple and/or family, relaxation and guided imagery, support groups and caregiving support groups
- Supportive care services: financial assistance, medication assistance, lodging and transportation, home visits, hospice care, palliative care, durable medical equipment (prosthesis), woman-to-woman mentoring program and access to online education.

UAB is recognized as one of the leading gynecologic oncology divisions in the world. UAB is the only institution to be awarded a Specialized Program of Research Excellence (SPORE) in Ovarian Cancer and Cervical Cancer by the NIH. With the state’s only NCI-designated Comprehensive Cancer Center, our patients have access to the most cutting edge cancer treatments and clinical trials available. Our UAB specialists are leaders in gynecologic oncology clinical care, and have considerable research experience in the areas of ovarian, endometrial and cervical cancer. Over the last 5 years, approximately 300 of our patients have been enrolled in clinical trials. To learn more about our services, please visit us on the web at uabmedicine.org/womenscancers.

Our faculty is committed to providing immediate consultations and care for your patients. For physician-to-physician consultations, or to refer your patient, please call UAB MIST at 1.800.UAB.MIST (800.822.6478) to be connected with our specialists.

The UAB Comprehensive Ovarian Cancer Program is located inside The UAB Women & Infants Center at 1700 6th Avenue South, Birmingham, AL 35233.
