

Program: Postgraduate Year 2 (PGY2) Critical Care Pharmacy Residency

Residency Program Director: **Alex H. Ward, PharmD, BCCCP**

Deadline: **January 1**

PGY2 Critical Care Pharmacy Residency: The PGY2 Critical Care Pharmacy Residency at UAB Hospital is a one-year program designed to provide extensive experience in a variety of critical care units and build upon skills developed as a clinical pharmacist during a post-graduate year 1 (PGY1) residency. Its focus is the development of the skills and confidence necessary to independently provide advanced pharmacotherapy management to patients in critical care settings. In addition to qualifying the resident for clinical pharmacy specialist positions in critical care or faculty areas, the successful completion of the program will also prepare the graduate to attain board certification in critical care pharmacy (BCCCP).

Orientation

- Orientation provides a general overview of the departmental organization, support units, and resident responsibilities.
